SKILLS

JavaScript

Python

C/C++

React/Next.js

Node/Express.js

FastAPI/Flask

Pytorch/NumPy/Panda

MongoDB/PostgreSQL

LinuxVPS

NN/AI Model Training

LANGUAGES

English

Full Professional Proficiency

Italian

Limited Working Proficiency

INTERESTS

Software

AI Learning

ML/DL

EDUCATION

Artificial Intelligence for Science and Technology

University of Milano-Bicocca

10/2025 - Present

Milan, Italy

Computer Science and Engineering

Eastern University

02/2019 - 03/2023

Dhaka, Bangladesh

WORK EXPERIENCE

Junior Software Developer

Skillerszone LLC

01/2024 - 12/2024

Dhaka, Bangladesh

BPO and Client Based App/Software Service provider

Achievements/Tasks

- I made myself more stronger in React/ Next.js Node.js, Svelte
- I got hand on experience in production level Node.js Backend Project and Python with FastAPI and bit Flask. As well MongoDB and PostgreSQL
- Learned fundamental about software deployment on VPS server

Intern Software Developer

IBOS LTD

09/2023 - 12/2023

Dhaka, Bangladesh

Product Based Software Industry

Achievements/Tasks

- There I made myself more stronger in JavaScript, Node.js, React.js and Python
- And I Improved my communication Skill
- I got more knowledge about Software Life Cycle and Architecture

ORGANIZATIONS

University of Milano-Bicocca (10/2025 - Present)

AI Learning

Software Development Community (Independent Learning)

PERSONAL PROJECTS

Digital Business Card Platform

- A QR-first digital identity product for modern networking, profile sharing, and lead capture.

Smart CMS

- A modular content and operations system for email workflows, admin management, and scalable internal processes.

Custom Client Portal

- A secure client-facing portal concept for managing users, uploads, communication, and service interactions.

Python API Utility Layer

- A lightweight backend-oriented product idea for exposing structured services through FastAPI or Flask for future AI and data-focused products.
